BRIGH COFFEE SHOP SALES ANALYSIS PRESENTATION

Table of Contents

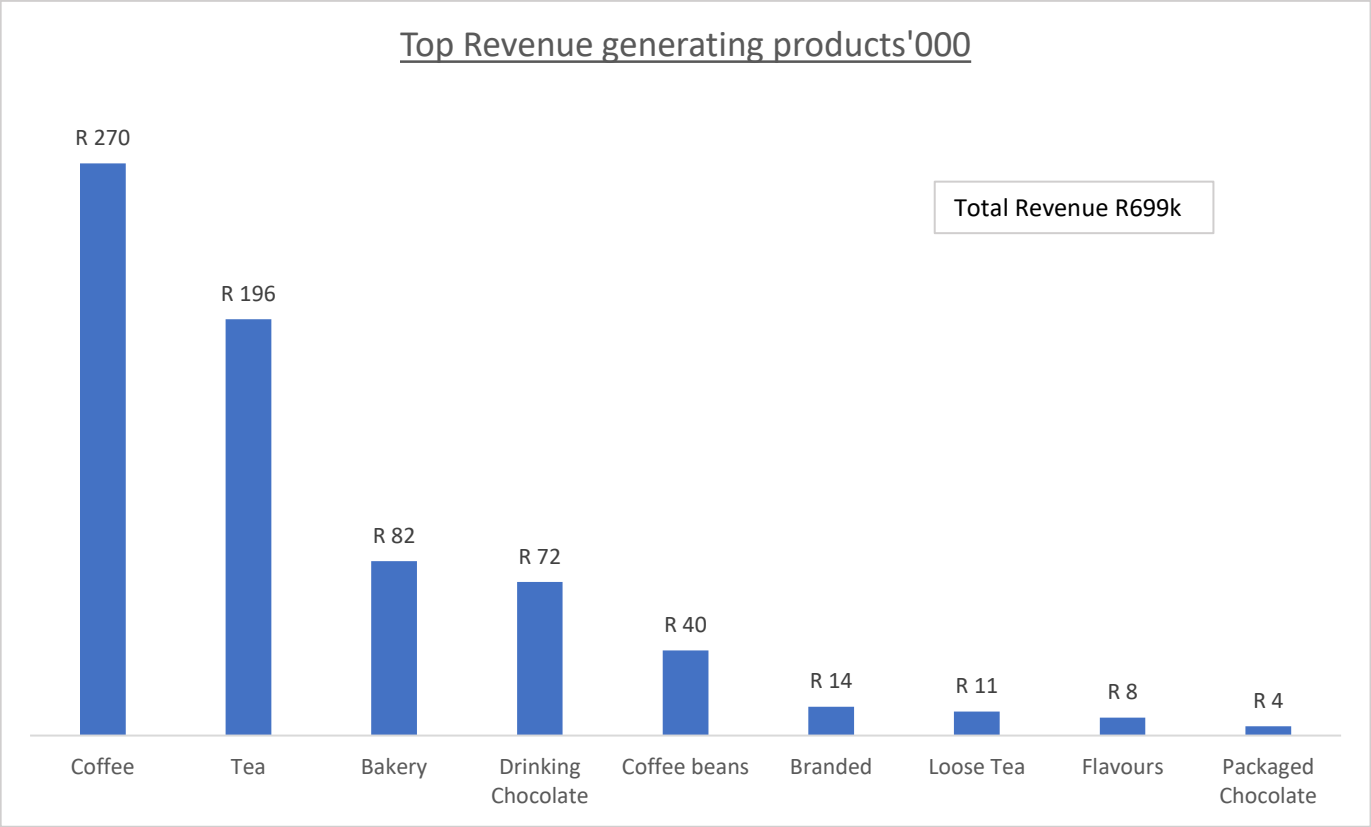
1. EXECUTIVE SUMMARY
2. PRODUCTS GENERATING THE MOST REVENUE
3. TIME OF DAY THE STORE PERFORMS BEST
4. SALES TRENDS ACROSS PRODUCTS & TIME INTERVAS
5. RECOMMENDATION FOR IMPROVING SALES PERFORMANCE

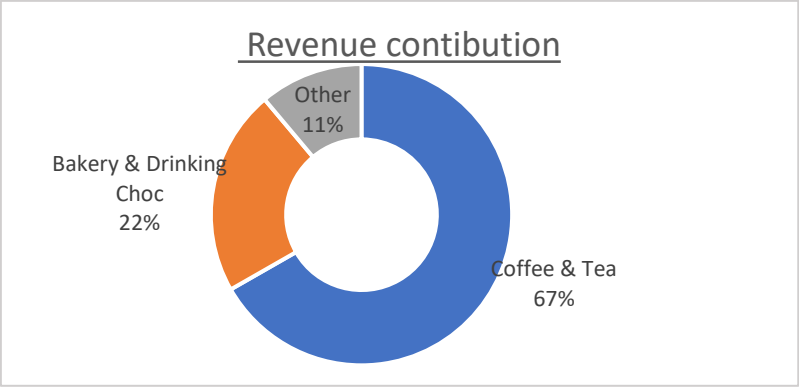
1. EXECUTIVE SUMMARY

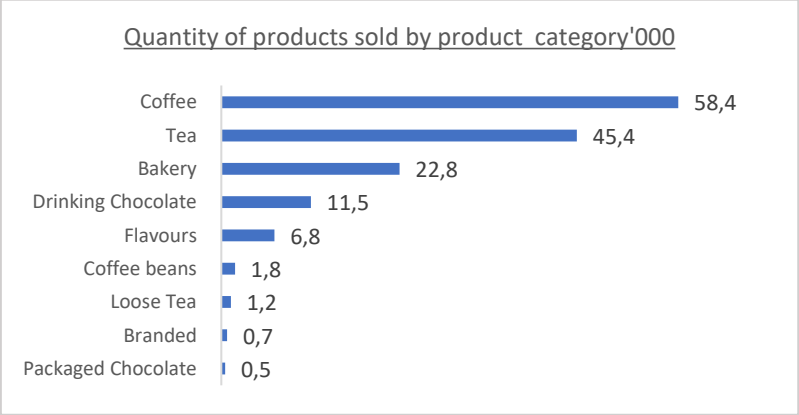
- Bright Coffee Shop’s performance is driven by core beverage categories, with Coffee and Tea contributing 67% of total revenue, while others contribute 33% combined
- Sales patterns reveal a strong morning-centric trading profile, with Mid-morning emerging as the peak period from both revenue and product volume
- Activity declines steadily through the afternoon and drops sharply in the evening and night, signalling clear off-peak windows
- Across all time intervals, Coffee and Tea remain dominant
- Overall, the analysis highlights significant opportunities to maximise high-performing morning periods, strengthen afternoon engagement, and strategically address weak evening performance through targeted promotions, product bundling and operational optimisation.

2. PRODUCTS GENERATING THE MOST REVENUE

- Coffee and Tea dominate performance, contributing 67% of total revenue and lead in both sales volume and revenue
- Bakery and Drinking Chocolate are strong secondary categories providing meaningful support of 22%
- Other categories are underperforming showing low sales and revenue, suggesting a need for repositioning

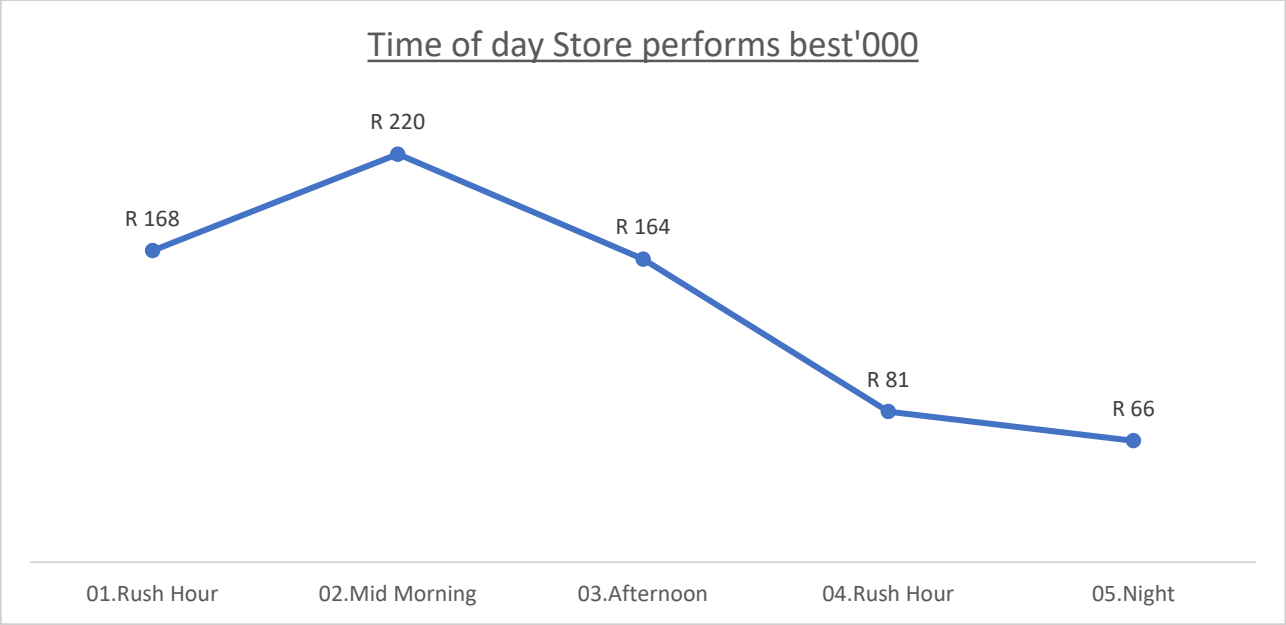


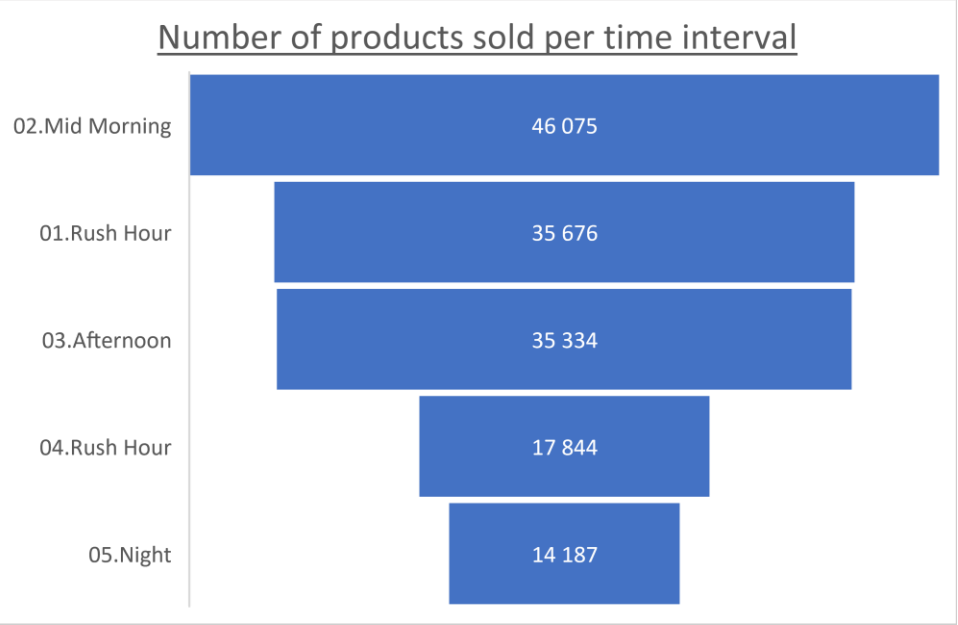




3. TIME OF DAY THE STORE PERFORMS BEST

- Mid Morning is the strongest period, delivering the highest revenue (R220k) and the most products sold (46k), making it the store's peak trading window
- Revenue declines steadily from afternoon into evening
- Night period is the weakest in both revenue and product sales, indicating minimal late-day activity





3. SALES TRENDS ACROSS PRODUCTS & TIME INTERVAS

	Product_category								
Time_classification	Bakery	Branded	Coffee	Coffee beans	Drinking Chocolate	Flavours	Loose Tea	Packaged Chocolate	Tea
01.Rush Hour	R21 044	R4 258	R61 972	R9 921	R17 444	R2 641	R3 247	R1 544	R46 055
02.Mid Morning	R27 118	R4 312	R82 500	R18 257	R20 712	R3 136	R4 139	R1 432	R58 556
03.Afternoon	R18 082	R2 865	R66 246	R6 098	R17 925	R1 342	R1 830	R801	R48 410

Total	**R82 316**	**R13 607**	**R269 952**	**R40 085**	**R72 416**	**R8 409**	**R11 214**	**R4 408**	**R196 406**

- Mid Morning is the strongest sales period across almost all products, with Coffee, Tea, Bakery and Drinking Chocolates showing highest revenue levels in this time slot
- Coffee and Tea consistently dominate every time interval, remaining the top revenue drivers regardless of the time of day
- Sales decline steadily from Afternoon into Evening and Night, with all product categories showing significantly lower performance later in the day, highlighting reduced customer activity

4. RECOMMENDATION FOR IMPROVING SALES PERFORMANCE

- Maximise the Morning Peak by ensuring full staffing and fast service flow to reduce queue drop off
- Strengthen Afternoon Performance by launching midday specials and using loyalty rewards to encourage repeat visits later in the day
- Address Weak Evening and Night Performance by offering evening-only promotions, introduce comfort items like warm drinks or small desserts or consider closing earlier if operational costs outweigh revenue
- Optimise Product Mix Based on Performance
  - Prioritise inventory, marketing and shelf space for top performers
  - Repackage low-performing items
  - Consider phasing out products with persistently low demand unless they serve a strategic purpose
- **Future recommendations:**
  - Automate daily sales reporting
  - Track sales performance across multiple locations in the future
  - Implement loyalty programs based on peak customer time slots
